

# KODIAK SERIES CAMERA FIRMWARE UPDATE INSTRUCTIONS

1.) Download the following files from [www.kodiakcamera.com/instructions](http://www.kodiakcamera.com/instructions)

**Make sure to decompress/extract the files after downloading them**

2.) Copy the files onto a blank SD card

3.) Insert the SD card with the files into your Kodiak Camera

4.) Turn the camera on

5.) Hold the UP button (#5)

6.) While holding the UP button, press the OK button (#6)

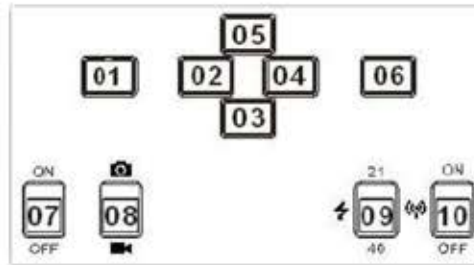

7.) Release the UP button once the letters "ISP" appear on the screen

8.) Wait for about 1 minute

9.) The upgrade is successful once the red indicator light on the front of the camera turns off

10.) Open the battery compartment of the camera to turn it off, then wait about 1 minute

11.) Close the battery compartment and turn the camera back on.

Congratulations, you've successfully updated your camera's firmware!
